AMERICA FOR AMERICANS

McKINLEY AND WILSON ABROAD.

In 1890 William McKinley was turned in life in the English manufacturing city of Sheffield; but in 1894 William L. Wilson was turned in life in London because he is the author of a Free-trade Tariff Bill. These are significant facts.

THE SILVER PROBLEM.

Commercial Gazette.
Farmer Anderson has two thousand bushels of wheat.
Mr. Jones has a thousand dollars worth of silver bullion.

Mr. Anderson's wheat is worth in the market \$1,000.
So is Mr. Jones's silver bullion.
Mr. Jones goes to Philadelphia, takes his silver to the mint and has it coined into two thousand nice, fine, pretty silver dollars.

Then Farmer Anderson brings along his thousand dollars worth of wheat, Mr. Jones buys it, paying him \$1,000—and he has \$1,000 left with which to buy the wheat of the next farmer that comes along.

This is free coinage. Some people are sure that all the farmers in the country are shouting for it.

We should see a good many strange things in this country if the silver people should have their way.

The McKinley Tariff was a Tariff for revenue; the Wilson Tariff is a Tariff for deficiency.

OVER \$9,000,000 was added to the public debt during April. The Treasury deficit now amounts to \$13,299,393. What a glorious record!

The monthly debt statement issued by the Treasury Department shows the debt of the United States, less cash in the Treasury, to be \$917,839,903, an increase of \$9,000,000 for the month of April. Yes, you're making a splendid record.

Oh, no; Democrats never steal offices. That is they hardly ever do so. The report of the Democratic Committee on the Governor's Election in Tennessee throws out enough votes to convert the 574 plurality for Evans on the face of the returns into a plurality of 2,358 for TURNER.

The total receipts of Uncle Sam's Treasury for the month of April were \$24,247,836, and the disbursements amounted to \$23,990,075, leaving a deficit for the month of \$257,761, and for the fiscal year to date of \$4,299,393. Oh, yes; what a magnificent record the Democratic financiers are making.

THIS IS A PROGRESSIVE AGE!
New and Startling Discoveries are Made Daily.

The greatest discovery for sufferers of Catarrh, Hay Fever, Asthma is May's Magnetic Catarrh Cure. Its wonderful cures since its discovery are known to thousands. This grand medicine will positively cure all forms of these terrible diseases. It accomplishes what no other remedy has done. So simple a child can use it. No cure no pay. One bottle will do the work and cure for a three months treatment. Entirely new; no other remedy made it. This is what the eminent Dr. Henry Carrington Alexander, D.D., LL.D., has to say of its marvelous cure: "The Mages Drug Co., London, Md.—I have used your Catarrh remedy I have intended to give you a voluntary testimonial of its efficiency. I have been a sufferer for years from nasal and post nasal catarrh, and the bone in my nose has been visibly changed in its shape."

After a trial of all manner of good and indifferent remedies, I have no hesitation in pronouncing your Magnetic Catarrh Cure the best, the speediest and most effective remedy I have yet encountered. I wish and predict your success in the effort to demonstrate the value of your new medicine in the hands of a truly scientific and meritorious inhalant. You have made my yearling doctor. I am, my dear Sir, yours faithfully,

HENRY CARRINGTON ALEXANDER.

The reader of this paper will be pleased to learn that there is at least one disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only medicine that cures Catarrh. It is a medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly on the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address, F. J. JAS. H. ECKELS.

The Controller of the Currency
Opposes Free Silver.

In an Address at the Detroit Chamber of Commerce Opening.

The American People Can Not Too Quickly Recognize That They Are in the Mist of a Propaganda. Who Aim to Revolutionize the Money System.

DETROIT, Mich., May 3.—Detroit's chamber of commerce was formally dedicated at noon Thursday, when Contractor Benjamin Hyde, of Chicago, turned over the keys to President Rufus W. Gillett. To celebrate the dedication a banquet was given in the Hotel Cadillac dining room Thursday evening.

Hon. James H. Eckels spoke on "Currency: Its Relation to the History of Finance."

Mr. Eckels confined his remarks to that single phase of the question which to-day engages public thought. He was sure that it was the most important problem with which the executive and legislative branches of the government have now to deal. The American people, he declared, can not too quickly recognize that they are in the midst of a propaganda, skillfully and zealously being carried on, with the end in view of revolutionizing the country's existing monetary system.

Those who now direct the free silver policy, that is the policy of its advocates and control their action, have ceased playing with words, and put from them the professions which heretofore have characterized their utterances when urging the cause for which they have stood. Their demand to-day, interpreted in the light of their act, is that the United States shall at once abandon its present standard and substitute therefor, in respect to money and without the consent of any other country, a single silver standard.

Nowhere is it suggested by the sponsors for this latest step in the silver creed that this nation shall even undertake to maintain at home a double standard. Nowhere is it, as is proclaimed in an attempt through international agreement to make every dollar of silver which shall be coined the equal in value of every dollar of gold which comes from the mint and fairly interchangeable therewith.

They no longer give recognition to the fact that every monetary union formed and conference held, that no nation can isolate itself from those with which it has commercial dealings, and maintain, independent of them, a distinctive standard of value.

It is not even suggested that the dollar coined shall approach, in intrinsic value, the value which it purports to carry, but instead a ratio shall exist between coins of the same denomination that is patently untrue.

The position which they now assume of necessity eliminates from their ranks all who heretofore have struggled to bring about a larger use of silver in the country's currency at an increased rate, and drive into the ranks of the opposition every honest champion of international bimetalism.

The plan laid is of their own making, the source of their own choosing, and in the face of their acts the believer in the single gold standard and the believer in a standard of gold and silver—silver should give them neither aid nor succor. They challenge the one and repudiate the other, and from both should be a united opposition.

The question as to which the friend of the maintenance of a medium of exchange of unquestioned and unquestionable value must address themselves is not how to temporarily defeat the advocates of free coinage of silver, as they now present it, but how to permanently insure the country against the danger which would flow from crystallizing into law any monetary suggestion which is based in whole or in part upon the doctrine of fiatism. Such result can not be attained by either scoffing at their leaders or underestimating the sources of strength of those who range themselves behind their banners.

The forces of fiat silver currency, of irredeemable paper and their populist allies can be permanently eradicated as factors worthy of consideration and sources of discontent and financial loss in but one way, and that lies through the gateway of sound monetary education.

NO MORE TOBACCO.

Beginning Next Fall Wesleyan University Students Must Abstain

DELAWARE, O., May 3.—Quite a breeze was created among the 800 students at the annual chapel exercises of the Ohio Wesleyan university, Thursday evening. President J. W. Dashiord, after giving some point-by-point statistics regarding the use of tobacco among college students, said: "Our faculty, after making careful study of the matter, have decided to ask all our students to discontinue the use of tobacco, beginning next fall, and if any tobacco users among us shall ask them to quit the habit, and if they do not we will dissolve partnership necessarily."

The step is a radical one, and will undoubtedly influence the attendance at Ohio Wesleyan university next year. Only about fifteen per cent. of Wesleyan's students use tobacco at present.

PLAN TALK!

In anticipation of an early and large spring trade we bought in large quantities the leading line of the best and finest Footwear to be found in America. A combination of circumstances (viz, the forced sale of the stocks of two of Mayville's old and honored shoe merchants on this market, an extremely cold and backward spring, etc.) necessarily forces us to sell more shoes in a shorter time this season than heretofore. To meet the emergency of the hour, (as it has ever been our purpose,) and give our patrons the

VERY BEST VALUES IN FOOTWEAR!

We have determined to cut our profits rather than our sales. With this we begin at once. Our entire stock is fresh and newer—everything up to date—bought at a time when footwear cheaper than ever known in the history of the world, and at the low prices we name (quality and style considered) cheaper than are to be found in the market. Come and see us. You will be pleased with what we have for you.
